

Intune is the Core of the Modern Workplace

Embrace **cloud-based endpoint management** to secure and manage your devices and applications

- **Create and deploy Intune policies** based on your requirements
- **Troubleshoot and remediate** device issues with AI recommendations
- **Enhance your security posture** and respond to threats, incidents, and vulnerabilities

Leverage Intune as a foundation for Copilot

Use Copilot AI Assistance to:

- **Protect** your organization data and access
- **Simplify** app management with a built-in app experience
- **Automate** app deployment, updates, removal, and policies
- **Increase user productivity** with self-service features
- **Boost your ROI** with lower costs, better visibility, and performance
